IPL Project Report and Your Contribution to Progress in Landslide Research and Technology

Dear IPL Project Leader,

This is to kindly remind you that your IPL Project Report for 2025 is due by the end of April 2026 and I would therefore like to request you to submit the Report using the attached form by this due date.

You are cordially invited to contribute to the [ICL Open Access Book Series “Progress in Landslide Research and Technology \(P-LRT\)”](#). P-LRT is now indexed in Scopus and has attracted immediate high interest and attention across the globe as shown in more than 1,000,000 Accesses in 3 years following the publication of the founding issue in January 2023. Volume 4 Issue 2: Memorial Issue for the Sendai Landslide Partnerships 2015-2025 and the Kyoto Landslide Commitment will appear soon, and Volume 5 Issue 1 will be published in autumn 2026. The 7th World Landslide Forum Thematic Issues are scheduled for Volume 5 Issue 2 and Volume 6. Regular articles will also be included in Volume 5 Issue 2 and Volume 6.

As an active ICL member and the IPL project leader, your contribution to P-LRT will benefit the Society and facilitate practical application of your landslide research and technology worldwide. All articles published in the ICL Open Access Book Series “Progress in Landslide Research and Technology” appear in the [UNESCO Disaster Risk Reduction Link](#) showing Keyword Mapping and Network Visualization. The UNESCO Link will continue to be updated as a new P-LRT issue is published.

By contributing to P-LRT, you are also eligible for the ICL Book Article Award and the IPL-KLC Award for Success, both of which were established in 2023.

Many thanks for your invaluable contributions to the ICL and the global Landslide community.

Best regards,

Shinji Sassa

Chair of ICL Network Committee and Acting Executive Director of ICL
